

What is Claimed is:

1. A communication clothes for users wearing and connecting with signals of a mobile phone, comprising:

a clothes for users wearing;

5 a connector disposed at a selected location on the clothes for connecting signal connection port signals of the mobile phone;

a speaker located on the clothes proximate to the ears of the users and linked to the connector for connecting the signals for generating audio signals for the mobile phone; and

10 a microphone located on the clothes proximate to the mouths of the users and linked to the connector for receiving users' speaking voice signals and transmitting to the mobile phone through the connector.

2. The communication clothes of claim 1, wherein the clothes is a jacket.

3. The communication clothes of claim 1, wherein the clothes is an outerwear.

15 4. The communication clothes of claim 1, wherein the clothes is a suit.

5. The communication clothes of claim 1 further including a keyboard attached to the clothes at a selected location and linked to the connector to form a signal connection for entering input information into the mobile phone.

6. The communication clothes of claim 5, wherein the keyboard is located on a sleeve 20 of the clothes adjacent the sleeve opening end.

7. The communication clothes of claim 6, wherein the sleeve further has a cover flap adjacent the sleeve opening end.

8. The communication clothes of claim 7, wherein the keyboard is coverable by the cover flap.

25 9. The communication clothes of claim 6, wherein the sleeve adjacent the sleeve opening end and the cover flap have respectively a Velcro strip attached thereon for the

cover flap to cover the keyboard and bond to the sleeve.

10. The communication clothes of claim 5, wherein the keyboard includes a plurality of push buttons, the push buttons including numeral buttons, character buttons, selection buttons, receiving buttons and cutoff buttons.

5 11. The communication clothes of claim 5, wherein the keyboard links to the connector through a first wire which is embedded on the stitches of a clothes rim.

12. The communication clothes of claim 1, wherein the clothes further has a hanging ring stitched thereon proximate to the connector for hanging the mobile phone.

13. The communication clothes of claim 1, wherein the clothes further has a pair of

10 Velcro strips stitched thereon proximate to the connector for holding the mobile phone.

14. The communication clothes of claim 1, wherein the clothes has a pocket to hold the connector, the mobile phone being held in the pocket and connecting to the connector signals.

15. The communication clothes of claim 1, wherein the clothes has a collar for hiding the speaker and the microphone.

16. The communication clothes of claim 15, wherein the collar is unfoldable for moving the speaker and the microphone closed to users ears and mouths.

17. The communication clothes of claim 1, wherein the clothes further has a cap for hiding the speaker and the microphone therein and fending off ambient interference 20 when users wearing the cap.

18. The communication clothes of claim 1, wherein the speaker and the microphone are spaced from each other for a selected distance to prevent signal interference.

19. The communication clothes of claim 1, wherein the speaker and the microphone are linked to the connector through a second wire, the second wire being embedded in 25 the stitches of a clothes rim.
